With the Non-Sentenced population remaining stable, and the Sentenced population steadily decreasing, obviously the Non-Sentenced percentage of the total ADP continues to rise. Around 1990, the Non-Sentenced and Sentenced populations were almost equal. By 1998, the year of peak ADP, the Non-Sentenced population had reached 57%. As the ADP has declined, the Non-Sentenced population has continued to rise, and is 62.3% as of the 4th Quarter of 2001. If this disproportion continues to increase, jail operations will have to change as well.
